

Curriculum Vitae

Family name: Stubkjær
First name: Erik
Date of birth: 3rd March 1941
Nationality: Danish

Education:

Institution	Year	Degrees, etc. obtained:
The Royal Veterinary and Agricultural University, DK	1964	Landinspektør (Chartered surveyor)
The Royal Veterinary and Agricultural University, DK	1969	Lic.agro. (PhD)
The National Survey and Cadastre, DK	1971	Surveyor's license
Aalborg University, DK	2002	Ph.D.-course: Critical Realism, 5 ECTS

Present and previous positions:

Sept. 2008 -	Professor emeritus and External lecturer at Department of Development and Planning, Aalborg University
1977 - 2008	Professor at Department of Development and Planning, Aalborg University
1971 - 77	Principal at Ministry of Finance, Copenhagen. - Participation (secretary, head of working group) in development of national information system on buildings and dwellings
1969 - 71	Trainee and chartered surveyor at surveying company Erik and Jens Harboe, Holte, Denmark

Honors and awards

Institution	Year	Grant
The Council of Helsinki University of Technology, Finland	2004	The Honorary Doctorate in Technology
The US National Science Foundation, on application by Dr. Barry Smith, University at Buffalo, Buffalo, NY	2003	Participation in the multi-disciplinary workshop: The Mystery of Capital and the Construction of Social Reality, with Hernando de Soto, Institute for Liberty and Democracy, Lima, Peru, and John Searle, University of California, Berkeley, hosted by the University at Buffalo, New York.
Aalborg University	1987	5 week study visit to university departments in the USA, focusing on research and teaching in Land and Geographic Information Systems

Experience in research and international teaching

2011 –	Co-supervisor of industrial Ph.D.-project: Conflict resolution in cases of property boundary disputes, performed in cooperation with Danish Geodata Agency
2010	Review of research project for Research Council of Canada Review of research project for Czech Science Foundation (GA CR)
2007 - 2010	Initiated and supervised a Ph.D. research project: ‘Mortgage Credit, Title Registration and Cadastre for Housing and Economic Development’, performed in cooperation with VP Securities A/S, Denmark.
2008	Developed parts of a short course in Spatial Data Infrastructures for professionals, and lectured it in Valetta, Malta, and later in Dublin, Ireland
2006 - 2007	Prepared and implemented the semester study programme ‘Land Management and Cadastral Development, focusing on Real Estate Taxation’ for visiting MSc and PhD students.
2003 - 2007	Organized the course: ‘Cadastral development - The contribution of scientific enquiry’ at the International Doctoral School of Aalborg University for PhD students from European Union and neighbouring countries in 2003 and in 2005. The 2007-version focused more on Spatial Data Infrastructures and national needs.
2001 - 2004	Supervised the Ph.D-project: Causes of Development of the Cadastre in Portugal.
2001 - 2005	Initiated and chaired the Management Committee of the research project ‘Modelling Real Property Transactions’, supported by ESF/COST as COST action G9. The project coordinated research in more than 10 European countries, including Greece, Hungary and Slovenia. Taking an Institutional Economics perspective, the project aimed at assessing the costs of transactions in real estate, e.g. the purchase of units of real property, mortgaging, and the identification and change of property units through cadastral processes. In order to relate activities to objectives and costs, the transactions were described in increasingly formal ways, abstracting from national peculiarities. The formalization process applied knowledge engineering approaches, aiming at the eliciting of core cadastral and legal ontologies.
2000 - 2001	Assessed for Higher Education Quality Evaluation Centre, Latvia, the MSc education at Latvia University of Agriculture, Jelgava, and Riga Technical University, Riga
1999 - 2007	Developed the course ‘International Land Management’ (Maa-20.375; 6 cr ~ 9ects) for the Helsinki University of Technology, Finland, and lectured it every 2nd year
1998 - 2001	Review of research projects, invited by the Academy of Finland, 1998, 2001
1996 - 2009	Developed an intensive one-week course: ‘A theoretical base for cadastral development’, for the Department of Real Estate and Construction Management, Royal Institute of Technology, Stockholm, and lectured it yearly
1996 - 1999	Initiated and coordinated the Phare/TEMPUS supported project: ‘Improved Education on Environment and Infrastructure’ (S-JEP 11001-96; Dept. of Geodesy, Ljubljana, Slovenia). The project regarded the restructuring of the study programme of the Department of Geodesy, Faculty of Civil and Geodetic Engineering, University of Ljubljana, Slovenia. Colleagues from university departments in Austria, Finland, the Netherlands, and Sweden were partners of the project, which resulted in a formally agreed renewal of the study programmes of the Department.

1992 - 2008	Member and 1997-99 chairman of scientific committee of Scandinavian Research Conferences in Geographical Information Sciences
1987 - 1990	Managed project, granted by the Danish Council of Technology, on development of educational software (TR 1987-143/440-870313)

Stubkjær, Erik (1996) A Theoretical Basis for Cadastral Development. Proceedings, Third Seminar of the European Co-operation Network for Education and Research in Land Information Systems (EUROLIS) September 1994, Delft. Faculty of Geodetic Engineering, Delft University of Technology, Delft. Pp 0.9-0.23.

Language skills:

Language competence on a scale of 1 to 5 (1 – excellent; 5 – basic)	Reading	Speaking	Writing
Danish	1	1	1
English	1	2	2
German	1	2	3

Computer literacy:

Established and maintained the website of the international research project: Modelling Real Property Transactions at <http://costg9.plan.aau.dk>. Contributes regularly to Danish and English Wikipedia. Familiar with the web standards HTML, CSS, SVG, XML, XSL. In the early 1990s, he developed educational software by means of the programming language PDC-Prolog.

Other

Stubkjær has served at committees for professorship (Norwegian University of Science and Technology, Trondheim, 1993; Agricultural University of Norway, 2001; 2002; University of East London, 2005), committees for doctorate (Royal Institute of Technology, Stockholm, 1996; Delft University of Technology, 2002; Agricultural University of Norway, 2002, 2004; Luleå University of Technology, 2004; Technical University of Vienna, 2006), and PhD fellow position (Aalborg University, 2006).

He is regional editor of Nordic Journal of Surveying and Real Estate Research, and in the editorial board of Geodetski Vestnik, the Journal of the Association of Surveyors in Slovenia. He is member of the Danish Association of Chartered Surveyors, and of the IT-section of the Society of Danish Engineers. During 1979-1988, he was member of the Tribunal of the Danish Association of Chartered Surveyors.

He serves as reviewer for scientific journals, including Land Use Policy; Computers, Environment and Urban Systems; Journal of Environmental Management; Nordic Journal of Surveying and Real Estate Research; and (Danish) Geoforum Perspektiv.

He used to lecture on the M.Sc. Programme in Surveying, mainly at 6th and 7th semester courses on land law and cadastral law, as well as legal and institutional issues related to Geographical Information systems. He facilitated the introduction in 1985 of a semester programme on Land Information Systems.
